Experience

Software Developer at MOVIQS,
Sharva Wheels Pvt. Ltd.

29/10/2024 - 29/01/2025

Contributing to the development of a robust Django-based logistics platform and a Flutter mobile app, focusing on backend scalability and cross-platform functionality

Certificates

Software Development Internship,
MOVIQS

28/04/2024 - 28/10/2024

Data Science Certification,
Top Coder

02/07/2023 - 7/09/2023

Artificial Intelligence Certification,
CDAC Pune and SSC NASSCOM
Assessment

27/06/2023 - 10/08/2023

Android App Development
Training, Internshala Company

13/08/2022 - 24/09/2022

Education

Bachelor of Technology in
Computer Science and Engineering

2020-2024 7.4 CGPA
Deenbandhu Chhotu Ram University of
Science & Technology, Murthal, Sonipat

Senior Secondary

2019 88%

Secondary

2017 10 CGPA

Landmark International School,
Gohana

Personal Skills :

- ✓ Time Management
- ✓ Adaptability
- ✓ Smart Work
- ✓ Teamwork
- ✓ Self-Motivation

Objective :

A dedicated Full Stack Developer with strong expertise in Mobile App Development, specializing in building scalable web applications and developing high-performance mobile apps. Skilled in both frontend and backend development, committed to delivering efficient, user-focused solutions. Passionate about continuous learning and leveraging modern technologies to solve real-world problems

Skills :

- **Web Development:** HTML, CSS, ReactJs, Bootstrap, REST APIs
- **Backend Development:** Django, Node, Express, PostgreSQL, MySQL, Sqlite
- **Mobile Development:** Flutter, Dart, Play Store/App Store Deployment
- **Android Development:** Kotlin, Jetpack Compose, XML, Android SDK, Material Design
- **DSA Programming:** C++, Python
- **AI & Data Science:** Machine Learning, Data Cleaning and Analysis, NumPy, Pandas, TensorFlow, CNN, NLP
- **Tools & Platforms:** Docker, Firebase, Linux, Redis, Celery, RabbitMQ
- **Version Control:** Git, GitHub
- **Cloud & Hosting:** AWS EC2 Hosting, Docker, Firebase
- **Other Skills:** MVC , MVVM Architecture, Agile methodologies, Graphic Design

Projects :

Moviqs Projects - Flutter|Django

As part of my experience at Moviqs, I am working on developing both a Flutter-based mobile application with Django-based web backend for a logistics platform. This project involves creating a seamless experience for managing logistics operations

Order Tracking System - ReactJs|NodeJs

Built an order tracking system using React.js and Node.js enabling Excel-based order imports, manage orders through create/edit/view interfaces, and visual dashboards for tracking business metrics. Focused on efficient data handling, validation, and performance optimization to support large datasets in real-time

Entry Mate Android App - Kotlin|Jetpack Compose

Developed a Native Vehicle Entry Detection App for our university, featuring real-time license plate recognition to log entries and notify vehicle owners instantly

Machine Learning Projects - NumPy|Pandas|TensorFlow|CNN|D3

- **Happy Sad Image Classifier Project** - Convolutional Neural Network (CNN) project that classifies human facial expressions, determining whether the subject is happy or sad from images
- **Data Analysis with Python Project** - Conducted data analysis and predictive modeling on various datasets using Python.
- **Data-Visualization-Graphs** - Using Python performed data visualization ie Bar Chart, Scatter Plot, Heat Map, Choropleth and Tree Map
